Regenerative Medicine Foundation Adopts a Global Recruiting Platform for its Corporate Council Members

FOR IMMEDIATE RELEASE

RegenerativeMedicineJobs.com partners with Regenerative Medicine Foundation in support of its mission to advance the development of regenerative medicines.

December 15, 2010 – Winston-Salem, NC – The Regenerative Medicine Foundation (RMF) today announced a partnership aimed at meeting the challenge of recruiting sufficient talent in what is the emerging, rapidly growing, and highly specialized field of regenerative medicine.

“We recognize that one of the many challenges facing the regenerative medicine community is the need to recruit the growing numbers and increasingly diverse kind of talent required to make this sector successful and bring these treatments to patients. This field requires an unprecedented amount of multidisciplinary generalists and specialists. RMF is working with academia and industry to ensure this kind of talent is being created in the context of the developing needs of regenerative medicine,” says DaLaura L.S. Kader, LLB, Vice President of Strategic Initiatives at the Foundation.

“RegenerativeMedicineJobs.com is a highly specialized and unique kind of recruiting platform which we believe will bring a lot of value to RMF’s Corporate Council members and the regenerative medicine industry worldwide,” stated Lee Buckler, the site’s co-founder and Managing Director. “We are pleased to partner with RMF and look forward to working together with their Corporate Council members as stakeholders investing in the ongoing growth and success of not only this industry but more importantly the therapies in development.”

About the Regenerative Medicine Foundation -- The Regenerative Medicine Foundation (www.regenerativemedicinefoundation.org), launched in 2005, is an internationally-focused, not-for-profit organization created to enable the advancement of new treatments and therapies based on regenerative medicine, and ultimately, to realize the goals of personalized medicine. Through educational programs, translational conferences and public policy initiatives, the Foundation advocates for increased medical research, promotes the training and education of scientists, and facilitates the translation of therapies to patients. The Regenerative Medicine Foundation maintains Corporate Council, an annual membership program for leaders in the field of regenerative medicine.
